Introduction:

Congratulations on the purchase of your RyfeMax machine. The following guide provides an introduction to Electro-therapy and recommendations for the use of your device. We wish you every success with your therapeutic treatments and the positive experience of using your new device!

CAUTION: This machine is an electro-therapy device and uses high frequencies.

Only use the RyfeMax machine in accordance with the instruction guide. Pay particular attention to the section on connecting the straps.

Ensure that water and other fluids do not come in contact with the RyfeMax machine.

DISCLAIMER:
RyfeMax and any of its associated products do not diagnose, cure, prevent or treat disease. It is an experimental device.

If you have a medical condition or concern please consult an appropriate health care professional.

By using this device you are accepting these conditions and in no way hold RyfeMax and its affiliates responsible for any outcomes.
Basics:

WHAT IS ELECTROTHERAPY TREATMENT FOR?

Bacteria, viruses and parasites cause *most* of today’s diseases.

Electro-therapy is used to kill bacteria, viruses and parasites. There are also various frequencies that have been found to be beneficial in aiding the body’s repair mechanisms.

Electrotherapy is also used for many other conditions that are not caused by bacteria, viruses or parasites.

HOW DOES A RIFE MACHINE WORK?

Dr Royal Rife discovered that all organisms (in fact all things) have a resonant frequency. An example of this was the collapse of the Broughton suspension bridge that collapsed in 1831 caused by marching soldiers whose footsteps matched exactly the resonant frequency of the bridge. Dr Royal Rife discovered, when organisms such as parasites, bacteria and viruses are subjected to their unique resonant frequency, they explode! Dr Royal Rife (and others) discovered the organisms that are the underlying cause of a disease and the resonant frequency that caused the organism to be destroyed.

Further research has been carried out by a number of other scientists who have discovered the resonant frequency of many more organisms that are the underlying cause of many of our health issues. Resonant frequencies for over 3,500 diseases have been discovered so far.
Technical Specifications:

**FREQUENCY RANGE**

1 hz - 2,000,000 hz (2 megahertz)

**ACCURACY**

\[ +0.5 \text{ hz (1 part in 2 million)} \]

**DESIGN**

The RyfeMax machine uses a state of the art microprocessor with a TFT touch screen.

**PRE-PROGRAMMED AILMENTS**

The Rife frequencies for over 3,500 ailments have been pre-programmed into the RyfeMax machine. No need to add the frequencies in yourself, just search for the ailment you are interested in.

**FAVOURITES**

The number of favourites is only limited to the amount of memory storage available, and is in excess of 100,000.

**VOLTAGE INPUT**

5v DC 1 amp from a USB power device. Any genuine phone charger, USB power bank or battery pack (supplied), computer USB port or USB car charger is O.K. to use as long as it meets the 5v DC 1 amp power requirement.

A battery bank that is used to charge your cell phone is an ideal charger because it allows you to be mobile while you are being treated by the RyfeMax machine.

There are many non-genuine, 3rd party USB phone chargers available on the market, some even claim 1 amp or more output, but in fact output less than 1/10th of the 1 amp power requirement.

If the Screen of the RyfeMax goes blank (not just dimmed) during the treatment cycle or continually re-boots, then the USB charger is most likely **NOT** suitable.

**OUTPUT FREQUENCY**

The rife-Max device outputs a radio frequency carrier wave that is modulated with an ailment specific square wave.

**RIFE FREQUENCIES**

The frequencies used by the RyfeMax machine are from the ETDFL Association. The ETDFL Association

ETDFL is an project based in Berlin Germany, with a vision to contribute innovative information and technology to the world.

ETDFL Have been compiling disease frequency data lists from 12 Bioresonance Clinics across the planet since June 2006.
Data is sourced from 12 Clinics which use the Quantum SCIO Bioresonance machine to record Disease frequencies of actual clients, and then produce the 10 most accurate frequencies which are deemed suitable for treatment with the Royal Rife Machine, Frequency Generator Devices, or Digital Zappers which can transmit 1 million frequencies, and also compatible with the Life Machine plus other Digital Programmable types of Electro Therapy Devices.

The ETDFL project began in 2006 when the original CAFL frequency list was discontinued. ETDFL became the industry standard for Bioresonance Frequencies and is now used by more than 100,000 Royal Rife Machine enthusiasts and clinics across the planet. The accuracy of the frequencies produces positive results for the clients who use this Frequency List in clinics and homes in every country.

ETDFL is updated once a year. Latest PDF versions are available at this website. The 12 International Language PDF versions of ETDFL will allow you to search the ETDFL Database for Disease frequencies which may be more up to date than the Paperback ETDFL provided with your Rife Machine.

SAFETY

There are 3 levels of safety built into the machine, including electronic circuitry and monitoring of the output. This ensures that the output voltage remains within manufacturers specifications.
How To Use The RyfeMax Machine:

**HOW TO CONNECT THE STRAPS (STANDARD MACHINE ONLY - DISCONTINUED)**

The best way to connect the straps is to the soles of your feet. Ensure that there is a firm connection from the metal pad of the strap to the hard pad of skin on the ball of your foot, where your big toe connects to your foot.

Alternatively, you can connect the straps to the hard skin under your little toe. In some instances this is more comfortable.

**HOW TO ADJUST THE STRAPS**

Slowly tighten the straps until the metal connection no longer moves over your skin. This will ensure the the straps are firm but not over tight.

**ALTERNATIVELY:**
With the release of the latest version of the RyfeMax machine (post 1-Aug-2019) you are now able to connect the straps to just above your ankles (the skinny part of your legs), with the connection pad connected to the inside of your leg.

If you connect the straps in this way and *then* put your pants on, the lead exits near your waistline, ready to connect to the RyfeMax machine, so you are able to walk around while running the machine.

If you have an ailment that involves your foot or anywhere below the connection point on your ankle such as Gout in your big toe, then it is recommended to connect the straps to the soles of your feet instead, as no Rife frequencies will travel below the connection points as they always flow from contact to contact.

**WARNING:**

If the straps are too lose, or for some reason slip below the suggested connection point, then you may experience a rash on the skin where the connector connects to your foot.

Always ensure the straps remain connected with a firm connection to the suggested connection point on your feet.

If you feel needles or sparks near the connection point, then stop using the machine immediately and contact ‘support’.

DO NOT use creme on your legs or swim in the ocean just before using the machine and ensure that your skin is dry and not sweaty.
HOW TO USE THE RYFEMAX AIR 100% CONTACTLESS MACHINE

The RyfeMax Air 100% contactless machine works within a 10 metre radius, line of sight.

KEEP THE MACHINE NEAR YOU

The more time you spend running the beneficial Rife frequencies, the quicker the results. We suggest running the machine 24/7 and just keep it near you.

When you are in the lounge room for longer than 10 minutes, then plug the machine in the lounge room. If you are in the office, plug it in and place it on your desk. When you go to bed at night, then plug it in and place it on your bed side table.

If you go out of the room for a few minutes (say when going to the bathroom) don’t worry about moving the machine.

RUNNING SWEEP ALL FAVOURITES

When running Sweep All Favourites, please do NOT have more than 4 favourites on your favourites list. This will ensure that you get many full cycles of each Ailment frequency per day.

RESUME FEATURE

When moving the machine from location to location, there is no need to click any buttons or do anything on the screen.

1 minute after powering on the RyfeMax machine, it will automatically resume at the beginning of your most recent 10 min frequency block.

How to get the best out of your RyfeMax machine

By using the RyfeMax machine, I understand that I am experimenting and I am taking matters into my own hands. I accept all outcomes as my own responsibilities.
HOW OFTEN DO I NEED TO USE THE RYFEMAX MACHINE?

How Often?

Start

Virus, Bacteria, Parasite?

Y

Run on 3 consecutive days

Symptoms persisting?

Y

check diagnosis

N

Parasite and symptoms returning?

Y

Run for 5 consecutive days and wait 2 days
Do this for a total of 3 weeks

N

Run every day until 2 weeks after your symptoms disappear
This could take up to 6 months
HOW DO I ADJUST THE DURATION?

How to adjust the duration

1. Click the 3 dots
2. Click Settings
3. Click the Frequency box until it becomes yellow
4. Adjust the value and click Save
HOW DO I SEARCH FOR AN AILMENT AND RUN IT?

How to search for an ailment and run program

Go to www.ryfemax.com and find the ailment you are interested in by clicking the link in the first paragraph.

Use the spelling in the list to search for the ailment on the Ryfemax machine.

1. Click the search button
2. Type in the first few letters of the ailment you are interested in
3. Click the Go button
4. Click the ailment you are interested in
5. Click the Run button
6. Click the Pause button to pause the program
HOW DO I RUN ALL MY FAVOURITES?

When you run “Sweep All Favourites”, the RyfeMax machine will run every frequency for the first ailment on your favourites list one after another, then do the same for the next ailment on your favourites list and so on until all of the frequencies for all of the ailments on your ailments list have been run.

If you have the Repeat checkbox ticked in Settings, then this process will continue on indefinitely.

Running “Sweep All Favourites” can take some time depending on the number of ailments you have set up in your favourites (minus the “Sweep All programs” and “Earth Resonant Frequency”) and the duration you have set up in Settings.

Time to Sweep All Favourites = number of ailments x 10 x duration in settings (in seconds)

If the time it will take to Sweep All Favourites is too long, then adjust the duration in settings.

EXAMPLE OF TIME TAKEN TO SWEEP ALL FAVOURITES

So if you have 5 ailments in your favourites and the duration is set to 600 then

Time to Sweep All Favourites = 5 x 10 x 600 = 30,000 seconds = 5 hours and 20 minutes.

WHAT IF THE “SWEEP ALL FAVOURITES” TAKES TOO LONG?

If the time it will take to sweep all favourites is too long, then simply pull the power plug out while it is running. The next time you power up the RyfeMax machine, it will allow you to resume where you left off. This way, you can run programs that take several days such as the “Sweep All Cancers”, “Sweep All Parasites”, etc.
Quick-Start

1. Connect either of the blue USB power cables to the machine and the power bank (battery pack).
2. Connect the black output cable with the yellow plug to the machine. Connect the other end to the straps.
3. If you have the RyfeMax standard version, Connect the straps to your feet as recommended.
4. Connect the blue USB power cable to a suitable USB charger. The RyfeMax machine will now do a memory and output frequency check and boot up into the favourites screen.
5. Click the 3 dots at the top right hand corner of the screen and click Settings (The settings menu).
6. Set the Duration to 600. This sets the amount of time for each frequency to 10 minutes, or one hour and forty minutes for the ailment.
7. If the ailment you are interested in is on your favourites list, use the scroll bars until you see the ailment you are interested in on the screen and click on it to select it. Go to step 10.
8. If the ailment you are interested in is not on your favourites list, then click the search button. Type in the first few letters of the ailment you are interest in. For a list of all ailments that have Rife frequencies, go to https://www.ryfemax.com:448/Ailments or try the symptom checker at www.webmd.com
9. Optionally use the scroll bars to find the ailment you are interest in.
10. Click on the ailment you are interested in.
11. Optionally click the “Saved To Favourites” icon, so the Ailment will appear on your favourites screen.
12. Click the Run button. When the program is complete, you will be returned to the Favourites screen.

“EARTH RESONANT FREQUENCY”

This will pulse the earth’s resonant frequency which is 7.85 hertz through your body.

This will do the equivalent of placing your bare feet in the sand (without the waves!).

Running Earth Resonant Frequency, may reduce your stress and you may sleep better.

Running Earth Resonant Frequency, makes your brain synchronise its brain wave activity to the 7.85 hertz. Doing this will put your brain into Theta wave activity, which is the state when you are just about to fall of to sleep.
“SWEEP ALL FAVOURITES”

This will go through all the ailments in your favourites list, and pulse each frequency of your favourite for a period set in the “Duration” value of settings. As an example, use this selection if you know you have parasites, but are not sure which type. Setup all the parasites you feel you may have as favourites and use the “Sweep All Favourites” selection.

To use this feature Go to the settings menu, select settings and set the Frequency to 600 (so each frequency will run for 600 seconds or 10 minutes) and check the repeat checkbox.

“SWEEP ALL CANCERS”

This selection will go through all the known Rife frequencies for the different cancers. It includes the BX and BY virus, identified by the inventor Dr Royal Rife as to the root cause for cancer. There are 356 different cancer frequencies, so take this into consideration, when running sweep all cancers.

Sweep All Cancers takes 2 Days 11 Hours and 10 Minutes to run.

When you are finished for the time being, simply pull the power plug out while it is running. The next time you power up the RyfeMax machine, it will allow you to resume where you left off.

Continue to do this until the entire sweep of Cancer frequencies is complete.

“SWEEP ALL PARASITES”

This selection will go through all the known Rife frequencies for the different parasites. There are 390 different parasite frequencies, so take this into consideration, when running sweep all parasites.

Sweep All Parasites takes 2 Days 20 Hours and 10 Minutes to run.

When you are finished for the time being, simply pull the power plug out while it is running. The next time you power up the RyfeMax machine, it will allow you to resume where you left off.

Continue to do this until the entire sweep of Parasite frequencies is complete.

“SWEEP ALL FREQUENCIES”

This selection will go through all the known Rife frequencies for all the ailments. It will take just under 6 hours, so it might be best to use this selection at night while you are asleep.

SELECTING THE CORRECT RIFE FREQUENCIES

If you are unsure of your condition, then we recommend visiting your doctor to get a diagnosis.

If you use the wrong Rife frequencies by selecting the wrong ailment, nothing will happen, of course the ailment you wish to use the RyfeMax machine for will not be treated.

You cannot “do anything wrong” with these treatments. If (for example) you can use the device to eliminate a particular parasite, and if you do not have this parasite, then the electrical frequency may simply fade without effect on the body.

WHAT IS THE HERXHEIMER REACTION?

When you begin using the RyfeMax machine, many parasites and pathogens are killed. This can overwhelm your immune system and lead to nausea, fatigue and dizziness. This is called the
'Herxheimer effect', or 'Parasite Die-Off Syndrome', an immune system response to toxins in the blood and tissues that were expelled by the dying parasite or pathogen.

This brief overloading of the liver and other eliminating organs worsen your symptoms at first. This can be a for a few hours, but can also last up to 2-3 days before you begin to feel much better. It is important to know that the worsening of symptoms does not mean the treatment has failed; in fact, it is exactly the opposite, namely the evidence for a very strong and effective detoxification.

**WHAT TO DO WHEN YOU GET A HERXHEIMER REACTION?**

The most important thing is to accept this reaction, as a confirming result of the treatment. If it is very severe, then reduce the time of treatment, drink lots of water (at least 3 L per day) and rest (no exercise!), eat lightly to not burden your digestive system additionally, add freshly squeezed lemon juice to your drinking water and make sure that your digestion system is working properly.

Take a rest from the Electro Therapy sessions for a few days until you recover.

**WARNINGS**

- If you use the frequencies of Lactobacillus Acidophilus then you may have to also take a pro-biotic.
- The following warnings are for RyfeMax Standard version only
  - If you are pregnant, then do not use the RyfeMax machine.
  - Your skin must be dry around the connection site of the straps.
  - If you get a rash where the straps are connected to your feet, then either…
    - A. You have the straps too loose i.e. there is not a good connection from the metal pad to your feet.
    - B. You have used creme on your feet or legs near the connection site.
    - C. You have just got out of the ocean and there is salt on your skin.
    - D. You have just got out of the shower.
- Do not place the machine on a soft surface such as a pillow or carpet.
Settings Menu:
There are 3 options in the Settings sub-menu.

SETTINGS

1. Set the number of seconds in the sleep timer, to set how long it will be before the screen dims.
2. Set the number of seconds that each frequency of the ailment runs for.
3. If you wish to disable the stop button while running a program then select the Autolock checkbox.
4. If you wish for the Rife frequencies to repeat, then select the Repeat checkbox.

ALIGN

This option will realign the touch screen with the display back to factory defaults. Use this option if the position on the screen to select the button does not align with the button properly.

RESET

Use this option to factory reset your RyfeMax device. It will delete all your favourites.

You might have to reset your RyfeMax machine if there has been a power outage and it has corrupted the favourites file.

You will know this has happened if …

   A. All of your favourites appear to be missing.
   B. There is a favourite that is a “.”
   C. When you save an ailment to favourites, it does not save.
Suggestions:

In this chapter, we will list some suggestions on how to get the best results using your RyfeMax rife machine.

Our website is [www.ryfemax.com](http://www.ryfemax.com)

To view the user guide, go to [http://45.35.13.61:96/UserGuide](http://45.35.13.61:96/UserGuide) (this document)

Pay particular attention to the flowchart and the 3 pages after that. This helps people to understand how to manage ailments.

For a list of ailments, go to [http://45.35.13.61:96/Ailments](http://45.35.13.61:96/Ailments)

If you can't find the ailment on the list, then lookup google for other names for the ailment.

GENERAL:

If you are wondering if the machine is working or not, the machine has 3 levels of output checking and will alert you if there is a problem in red at the bottom of the screen.

If you get no improvement in your symptoms, then it means the diagnosis of your problem is incorrect.

**If you are suffering from a migraine and you use the machine for brain cancer nothing will happen, good or bad. I.E. you need a correct diagnosis!**

Case in point. Leone and I contracted Malaria in Ecuador. We had really bad flu symptoms and used the machine for cold & flu, gram positive, gram negative, influenza A, Influenza B, nothing seemed to work. We went to [www.webmd.com](http://www.webmd.com) and entered our symptoms. It came up with only 1 thing Malaria. 1st treatment the filthy headache was gone, after the 3rd treatment all symptoms were gone minus the fatigue, which went away after our bodies regenerated enough red blood cells which took 3 weeks.

**You can not use the machine too much! The more time on the machine the quicker the results.**

FOR BEST RESULTS:

Run the machine daily with the duration set to 600. (doesn’t have to be at the same time).

If you have an ailment like chronic fatigue, then run the machine on that ailment daily. Also add possible root causes for the ailment, such as ross river fever (alpha virus infections), dengue, Epstein Barr or Malaria. Look into your history as to any of those kinds of viruses that “stay with you” through your life and add them to favourites.

At night while you sleep, also run sweep all favourites, with the duration set to 600 and the repeat checkbox ticked. When you are done for the night, simply pull the blue power plug from the battery pack and when you power up again, the RyfeMax machine will ask you if you wish to resume your previous session.
BACTERIA:

Generally run for 3 consecutive days, duration = 600.

CANDIDIASIS (CANDIDA OVERGROWTH, YEAST INFECTION, THRUSH):

Usually need to run Candidiasis for 30 days consecutive, duration = 600. We have found this generally causes really bad flu like symptoms because of the toxins released via the Candida die off.

If the symptoms become unbearable, then run Candidiasis one day, Liver Detox the next and have a rest the third day. Of course, it will then take longer.

While running Candidiasis, we suggest taking MRM Cardio Chelate from iHerb. Take 2 tablets 3 times a day (or whatever your healthcare professional suggests). This will bind to the toxins and facilitate elimination.

If you look at your tongue, if it is no longer white, then your Candida overgrowth has subsided. Run the Candidiasis for another 15 times.

CANCER:

Dr Rife found the root cause of Cancer was the BX & By Virus. If you are diagnosed with ovarian cancer and a secondary on your neck, then run the BX & BY virus every day duration = 600. Preferably also run your primary (the cancer you have been diagnosed with) every day also duration = 600. Also add BX & BY virus, and the cancer you were diagnosed with to your favourites and run every night.

You must run it in this fashion every day for 4 - 6 months. Continue for 1 month after the all clear.

Why is there a need for a diet also?

Cancer is a war in your body. As you are killing off the Cancer virus, more Cancer cells are growing. When you remove all sugars from your diet (apart from whole fruit or organic raw honey) you are removing the food source that the Cancer uses to grow.

Coupled with killing off the cancer virus, you are tipping the war in your favour.
CANCER DIET:

It has been proven that Cancer feeds on Sugar, and Sugar also provides an Acidic environment which induces the Cancer cells to grow. Your body does make glucose from all foods but not all sugars are created equal.

No: pasta, rice, bread, flour, junk food, sugar or sugar substitutes or anything containing dextrose, sugar, high fructose corn syrup, soft drinks (including the zero sugar varieties), coffee, alcohol, biscuits, chips, avoid all processed foods. Basically eat a diet of meat and veg (spices are o.k.) The preference is organic if this is possible but not mandatory.

When eating meat, ensure that you either take the juice of 2 lemons with your meat or use about 1/2 teaspoon of Celtic Sea salt on the meat.

No DON’T use the lemon juice from the supermarket or anything else like that, use 2 freshly squeezed lemons.

Doing this will make the meat neutral to alkaline instead of acidic.

We have found many clients to have had dramatic results with this diet.

ABSOLUTELY NO CHEATING

COLD SORES:

For Cold Sores run for Herpes labialis for 5 consecutive days, duration = 600.

Running programs for certain viruses such as yellow fever, shingles, cold sores, dengue will activate the virus then kill it, so you will experience some symptoms while using the machine.

DETOX:

When running any sort of Detox, you MUST also take a chelating agent such as MRM Cardio Chelate from iHerb. Take 2 tablets 3 times a day (or whatever your health care professional suggests) while detoxing.

If you start to get a rash while detoxing, this means that your body is eliminating the toxins via your skin. If necessary, do a detox one day, then have 2 days break (but still take the MRM Cardio Chelate).

ENLARGED PROSTATE:

Run prostate enlarged every day for about 6 weeks or more, duration = 600.

MALARIA:

Run Malaria for 3 consecutive days duration = 600.

OSTEOARTHRITIS:

Run Arthritis every day, duration = 600. Also add Arthritis, pain, inflammation, to favourites and run sweep all favourites duration = 60 every night while you sleep.

The Arthritis program covers both Osteoarthritis and Rheumatoid Arthritis.
PARASITES:
According to Wikipedia, 30% - 50% of people have parasites (yes even in the western world), other sites such as https://www.victoriahealth.com/editorial/most-of-us-have-intestinal-parasites quote as high as 80% of people have parasites. We like to run Parasites General Comprehensive for 3 consecutive days before doing anything else.

Generally run the specific parasite, or Parasites General Comprehensive for 3 consecutive days duration = 600.

If the symptoms seem to reappear then run the program 5 days on, 2 days off, 5 days on, 2 days off 5 days on. This is because not all parasites have the same life cycle.

RHEUMATOID ARTHRITIS:
Run Arthritis every day, duration = 600. Also add Arthritis, pain, inflammation, to favourites and run sweep all favourites duration = 60 every night while you sleep.

The Arthritis program covers both Osteoarthritis and Rheumatoid Arthritis.

SHINGLES:
For Shingles, run Herpes Zoster for 5 consecutive days, duration = 600. Running this will activate the virus and kill it.

If the symptoms do not go away, then either you are immune compromised or you have other herpes viruses in the herpes family.

If you are immune compromised or you have other herpes viruses in the herpes family, run Herpesviridae Infections and Herpes Zoster every day until the symptoms disappear (this could take many weeks).

SLEEP - PROBLEMS GETTING TO SLEEP:
Run Earth Resonant Frequency, duration = 600, Repeat = Cross and go to bed.

TAPE WORMS:
Run Cestoda infections (which is tape worms) and Echinococcosis (tape worm eggs) duration = 600 5 days on, 2 days off, 5 days on, 2 days off, 5 days on.

VIRUSES:
Generally run for 3 consecutive days. If you have a cold or flu, then run cold & flu 2 x in the first day duration = 600. You will feel much better the next day but will be coughing up lots green phlegm (the dead virus) the next couple of days.

Or, if you run the sweep all cold and flu on 2 consecutive days.

OTHER AILMENTS:
Generally run the machine for 6-8 weeks consecutively or 2 weeks after the symptoms have gone.
Troubleshooting

HOW TO CLEAR ALL YOUR FAVOURITES:

This action will remove all of your favourites from the favourites menu, and return the machine to the original condition from the factory.

1. Click the 3 dots in the top right hand corner.
2. Select Reset.
3. Click the Reset button.

HOW TO RESET YOUR FAVOURITES:

This action will return your machine to the original factory condition, but your favourites will remain intact.

It is possible that the favourites file becomes corrupt due to a power interruption when the machine is writing to the favourites file.

You might use this if your favourites have become corrupt, such as one of the “Sweep All” items has disappeared from the favourites menu or if garbage appears on the screen when you are looking at your favourites.

1. Write down on a list the name and exact spelling of each favourite, excluding the frequency sets under the <Folder> Sweep All… folder
2. Click the 3 dots in the top right hand corner.
3. Select Reset.
4. Click the Reset button.
5. Click the search button.
6. Type in the first few characters (3 or more) of the first favourite you have written down.
7. Hit the Go button.
8. Use the scroll bars to find the favourite you have written down.
9. Select the favourite you have written down.
10. Click the Saved To Favourites button so a tick is displayed.
11. Click the Main button.
12. Repeat steps 5 - 11 for each of the favourites you have written down.
THE BUTTONS DO NOT SEEM TO WORK

The most likely cause is that your screen is not properly aligned.

To realign the touch screen with the display, see the section under the Settings menu.

If you are still experiencing problems with or after aligning the screen, then contact “support”.

DIAGNOSTIC FAILURE WINDOW IS DISPLAYED

The RyfeMax machine has 3 levels of output checking to ensure that the machine is working correctly.

However, if a problem has arisen in the output, then this message will show up in red at the bottom of the screen.

1. Try powering the machine off, wait 10 seconds and power the machine back on again.
2. If the above does not work, then your machine will have to be returned to the factory for repair.

The turn around time is usually 1 -2 working days plus time for postage both ways.

I CAN'T FIND MY AILMENT ON THE LIST

Sometimes, the ailment you are interested in is spelled a little differently or goes by another name.

If you can’t find your ailment on the the list, then search on Google for other names of the ailment and search on our website http://45.35.13.61:96/Ailments for the other names.
Sales And Enquiries:

We are always looking for distributors. For sales and enquiries please contact:

info@ryfemax.com
